English language

Hello!

Hi!

How are you?

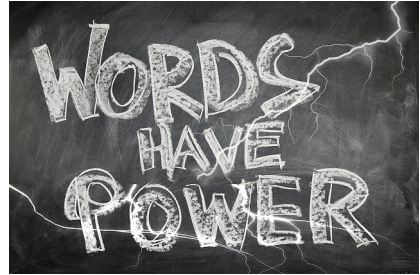

Goodbye!

Business English Success Package

Why learn English for business?

How many sales are you not making and how much revenue have you been losing because your English level isn't as good as it needs to be?

How much more successful would you be if you improved your level of understanding and speaking English in your business?

In today's business world, English is the main language used to communicate ideas and information between the businesses of the world.

Being able to communicate at a good level is important if you want to be successful in your chosen field, whether Sales and Marketing, Information Technology, Finance or any other industry.

Many non-native speakers understand this requirement but have difficulty improving their level of English. For some it is just that they don't have time to learn and practice. Some are just not comfortable going back to a traditional classroom. Some just haven't found the right program, instructor or tutor.

Sometimes the available programs are just not suitable for the business person's line of work and seem too rigid. Too much grammar and vocabulary drills and not enough conversational practice in real-world business situations. You are forced to follow the instructor's agenda and training package. There is no room for customization to your requirements.

Business English Success Package

The Business English Success Package is the English improvement and practice package that you need.

Working with a native speaker who truly wants to help and ensure that you improve your business English capability, you will develop the language of business. This includes common vocabulary for meetings and telephone conferences, how to meet people and make them comfortable through small talk, cultural norms that can trip you up when travelling to foreign countries or meeting foreign clients at your home office. Idioms that make the language more colourful and vibrant as well as understanding things that you shouldn't say that could get you in trouble.

You will also role-play business situations so that you become comfortable when you encounter them in your daily routine.

The Business English Success Package is customized to your requirements. It is not a "one-size fits all" program. You have a say in what you practice and work on.

You can also have your written material reviewed and commented on so that your writing

also becomes better and more readable and understandable by your clients.

You don't need to speak and write English in your business perfectly but it has to be of a high enough level so that you are understood and you make the sales and connections that can move you and your business forward.
